Useful Commands

Roadmap & Status

1. Platform Overview

CallMyProf is an international tutoring platform connecting students with qualified tutors. The platform supports multiple languages (English, French, Arabic with RTL), handles the complete student journey from lead capture to video sessions, and provides comprehensive admin tools for managing the business.

28K+	27+	60+	3
Lines of Code	Pages	API Endpoints	Languages

Business Flow

Student sees an ad (TikTok, Facebook, Instagram, Google)

Fills out the form on callmyprof.com

A lead is created in the CRM

Admin contacts and qualifies the need

Booking email sent → student picks a time slot

Payment → auto-generated video link → tutoring session

Pricing

Service Type	Price/Hour
Individual 1v1	$15/hour
Online Session	$12/hour
Group Class	$8/hour

CRM Pipeline

`NEW` → `CONTACTED` → `QUALIFIED` → `CONVERTED` (or `LOST`)

2. Technical Architecture & Stack

Core Stack

Component	Technology	Purpose
Runtime	Cloudflare Workers	Edge-deployed TypeScript SSR
Database	Cloudflare D1 (SQLite)	Globally distributed database
File Storage	Cloudflare R2	Documents, avatars, uploads
AI	Workers AI (Llama 3.1)	Chatbot assistant
Email	Resend API	Transactional emails
Video (Primary)	Daily.co	Video conferencing rooms
Video (Fallback)	Jitsi Meet	Free fallback video
Payments	Stripe + PayPal	Payment processing (planned)

Architecture Principles

- **Single Worker** - One Cloudflare Worker serves everything (public + admin + portals)
- **Zero Frontend Framework** - Vanilla JS inline, server-rendered HTML
- **Single Entry Point** - `src/index.js` contains all logic
- **French Business Naming** - `formateur`, `cours`, `eleve` for business concepts
- **English Technical Naming** - `request`, `response`, `handler` for technical code

Design System

Element	Value
Primary Color	`#DC2626` (Red)
Charcoal	`#1E293B`
Font	Inter
Border Radius	8-12px

3. All Platform Links & URLs

Production URL: https://callmyprof.com
Dev URL: https://ffb01a2e-callmyprof.samirdawaliby.workers.dev
Local Dev: http://localhost:8787

3.1 Public Pages

Page	URL	Description
Homepage	`/`	Landing page with lead capture form
About	`/about`	About CallMyProf
Contact	`/contact`	Contact information
FAQ	`/faq`	Frequently asked questions
Terms	`/terms`	Terms of service
Privacy	`/privacy`	Privacy policy
Assignment Help	`/assignment-help`	Homework assistance page
Tutor Onboarding	`/onboarding`	4-step tutor application
Thank You	`/thanks`	Post-action confirmation
Health Check	`/health`	System health endpoint
Setup	`/setup`	Initial setup page
Daily Video Demo	`/session-demo/daily`	Daily.co demo room
Jitsi Video Demo	`/session-demo/jitsi`	Jitsi demo room

3.2 Admin Dashboard Pages

Page	URL	Description
Login	`/login`	Admin authentication
Dashboard	`/dashboard`	Admin overview with KPIs
Leads	`/leads`	CRM lead management
Tutors	`/formateurs`	Tutor management list
Tutor Detail	`/formateurs/:id`	Individual tutor profile

Students & Families	`/familles`	Student/family management
Family Detail	`/familles/:id`	Individual family profile
New Family	`/familles/new`	Create new family
Catalogue	`/catalogue`	Subject domains & themes
Assignments	`/assignments`	Homework assignments
Classes & Calendar	`/cours`	Classes management
New Class	`/cours/new`	Create new class/session
Class Detail	`/cours/:id`	Individual class details
Private Session 1v1	`/sessions`	1-on-1 video sessions
Group Classes	`/group-classes`	Group class management
New Group Class	`/group-classes/new`	Create new group class
Group Class Detail	`/group-classes/:id`	Group class detail & chat
Packages	`/packages`	Hour package management
Payments	`/payments`	Payment tracking
Calendar	`/calendar`	Visual calendar view
Reviews	`/avis`	Student reviews/ratings
Statistics	`/statistiques`	Analytics & charts
Support Tickets	`/support-tickets`	Support ticket management
Ticket Detail	`/support-tickets/:id`	Individual ticket view
Doc Verification	`/doc-verification`	Document verification

3.3 Student Portal Pages

Page	URL	Description
Login	`/portal/login`	Student login
Signup	`/portal/signup`	Student registration
Forgot Password	`/portal/forgot-password`	Password recovery
Reset Password	`/portal/reset-password`	Password reset form
Dashboard	`/portal`	Student dashboard with stats
My Sessions	`/portal/sessions`	Upcoming & past sessions
My Payments	`/portal/payments`	Payment history

My Profile	`/portal/profile`	Edit student profile
Security	`/portal/security`	Password & security settings
Support	`/portal/support`	Support tickets
Support Ticket	`/portal/support/:id`	View specific ticket

3.4 Tutor Portal Pages

Page	URL	Description
Login	`/tutor/login`	Tutor login
Signup	`/tutor/signup`	Tutor registration
Forgot Password	`/tutor/forgot-password`	Password recovery
Reset Password	`/tutor/reset-password`	Password reset form
Dashboard	`/tutor`	Tutor dashboard
My Classes	`/tutor/classes`	Upcoming & past classes
My Schedule	`/tutor/schedule`	Availability management
My Students	`/tutor/students`	Student list
My Payments	`/tutor/payments`	Earnings & payouts
My Profile	`/tutor/profile`	Edit tutor profile
Security	`/tutor/security`	Password & security settings
Support	`/tutor/support`	Support tickets
Support Ticket	`/tutor/support/:id`	View specific ticket

3.5 API Endpoints

Public API

Method	Endpoint	Description
POST	`/api/leads`	Create new lead from form
POST	`/api/booking`	Create booking
POST	`/api/chat`	AI chatbot endpoint
POST	`/api/assignment-help`	Submit assignment help request
POST	`/api/test-email`	Test email sending

Admin API

Method	Endpoint	Description
POST	`/api/leads/:id/status`	Update lead status
POST	`/api/leads/:id`	Delete lead
POST	`/api/leads/:id/send-booking`	Send booking link to lead
POST	`/api/formateurs/:id/status`	Update tutor status
POST	`/api/formateurs/:id`	Update tutor info
POST	`/api/familles`	Create family
POST	`/api/cours`	Create class/session
POST	`/api/cours/:id/statut`	Update class status
POST	`/api/cours/:id/terminer`	Mark class completed
POST	`/api/group-classes`	Create group class
POST	`/api/group-classes/:id`	Update group class
POST	`/api/group-classes/:id/members`	Manage members
POST	`/api/group-classes/:id/chat`	Group chat
POST	`/api/calendar/slots`	Create calendar slot
POST	`/api/packages`	Create package
POST	`/api/payments`	Create payment
POST	`/api/admin/verify-doc`	Verify document

Student Portal API

Method	Endpoint	Description
POST	`/api/portal/profile`	Update student profile
POST	`/api/portal/password`	Change password
POST	`/api/portal/avatar`	Upload avatar
POST	`/api/portal/delete-account`	Delete account
POST	`/api/portal/support`	Create support ticket
POST	`/api/portal/support/:id/reply`	Reply to ticket
POST	`/api/portal/payment-methods`	Add payment method
POST	`/api/portal/document`	Upload document
POST	`/api/portal/notifications`	Update notification prefs

Tutor Portal API

Method	Endpoint	Description
POST	`/api/tutor/profile`	Update tutor profile
POST	`/api/tutor/password`	Change password
POST	`/api/tutor/avatar`	Upload avatar
POST	`/api/tutor/schedule`	Add schedule slot
POST	`/api/tutor/payout-settings`	Update payout settings
POST	`/api/tutor/support`	Create support ticket
POST	`/api/tutor/support/:id/reply`	Reply to ticket
POST	`/api/tutor/document`	Upload document

Payment & Webhook Endpoints

Method	Endpoint	Description
POST	`/api/payment/create-session`	Create payment session
POST	`/api/payment/process-card`	Process card payment
POST	`/api/webhooks/checkout`	Stripe checkout webhook
POST	`/api/webhooks/paypal`	PayPal webhook
GET/POST	`/api/webhooks/whatsapp`	WhatsApp Business webhook

4. Database Schema & Migrations

4.1 Core Tables

Table	Description	Key Fields
`users`	All user accounts (admin, students, tutors)	id, email, prenom, nom, role, lead_id, formateur_id
`sessions`	Authentication sessions	id, user_id, expires_at
`leads`	CRM leads from website forms	id, prenom, nom, email, telephone, statut, utm_source
`formateurs`	Tutor profiles & qualifications	id, prenom, nom, email, statut, specialites
`bookings`	Booking-flow sessions	id, lead_id, booking_date, booking_time, video_provider
`cours`	Admin-created class sessions	id, formateur_id, date_cours, type_cours, video_room_url
`cours_eleves`	Student enrollment in classes	cours_id, eleve_id, heures_debitees, present
`calendar_slots`	Tutor availability slots	id, formateur_id, jour, heure_debut, heure_fin
`thematiques`	Subject themes catalogue	id, nom, sous_domaine_id
`sous_domaines`	Subject sub-domains	id, nom, domaine_id
`domaines`	Subject domains	id, nom
`group_classes`	Group class definitions	id, titre, max_eleves, inscrits, prix_par_eleve
`group_class_members`	Group class enrollments	group_class_id, user_id, role
`group_chat_messages`	Group class chat	id, group_class_id, user_id, message
`packages`	Hour packages	id, eleve_id, heures_total, heures_utilisees
`support_tickets`	Support tickets	id, user_id, subject, statut
`ticket_responses`	Ticket replies	id, ticket_id, user_id, message
`payment_methods`	Saved payment methods	id, user_id, type, last_four
`signup_tokens`	Registration tokens	token, email, role, expires_at
`password_reset_tokens`	Password reset tokens	token, email, expires_at

4.2 Migrations Applied

#	File	Description	Status
0007	0007_portals.sql	Student & tutor portals, signup tokens, support tickets	Applied
0008	0008_enhanced_profile.sql	Enhanced profile fields (gender, DOB, photo, documents)	Applied
0009	0009_payment_methods.sql	Payment methods table, tutor payout settings	Applied
0010	0010_group_chat.sql	Group class members & chat messages	Applied
0011	0011_fix_cours_eleves_fk.sql	Fix foreign key constraint on cours_eleves.eleve_id	Applied
0012	0012_cours_video_columns.sql	Add video_provider, video_room_url, video_host_url, video_room_name to cours	Applied

5. All Updates & Changes (March 29, 2026)

All changes listed below were implemented, deployed, and verified on production on March 29, 2026.

5.1 Foreign Key Fix (cours_eleves)

Item	Detail
Problem	Creating a session at `/cours/new` failed with "FOREIGN KEY constraint failed"
Root Cause	`cours_eleves.eleve_id` had a FK referencing the empty `eleves` table, but student IDs came from the `users` table (role='eleve')
Fix	Migration `0011_fix_cours_eleves_fk.sql` recreated the table without the invalid FK constraint
Code Changes	All queries changed from `JOIN eleves` to `JOIN users WHERE role='eleve'`
Files Modified	`src/index.js` (getCoursFormData, cours detail query, tutor students query)

5.2 Email Notifications on Session Creation

Item	Detail
Feature	Auto-send email to students and tutors when a session is created via `/cours/new`
Templates Added	`sessionCreatedStudentEmail()` and `sessionCreatedTutorEmail()`
Email Content	Session date, time, subject, tutor/student name, video link (if available)
Sender	Resend API via `noreply@callmyprof.com`

5.3 Student Portal Session Visibility

Item	Detail
Problem	`/portal/sessions` only showed sessions from `bookings` table, not admin-created `cours`
Fix	Added `cours_eleves` queries to `renderStudentSessions()`, merging both data sources
Result	Students now see all their sessions regardless of how they were created

5.4 Student Dashboard Counters

Item	Detail
Problem	Dashboard at `/portal` showed "0 Upcoming Sessions" despite having sessions
Root Cause	Only counting from `bookings` table via `lead_id`, not from `cours_eleves`
Fix	Added `cours_eleves` count queries to `renderStudentDashboard()`
Result	Dashboard now shows correct count (e.g., "2 Upcoming Sessions") and next session info

5.5 Student Names in Admin Classes Table

Item	Detail
Feature	Added student names column to the `/cours` admin table
Implementation	Added `GROUP_CONCAT` subquery joining `cours_eleves` with `users`
Display	Shows comma-separated student names (e.g., "Samer Dawaliby, Rony El Ghawi")

5.6 Admin Sessions Page Merger

Item	Detail
Feature	`/sessions` now shows both booking-flow sessions AND admin-created cours
Implementation	Added second query for `cours` table, merged results sorted by date
Visual	Cours sessions show "Cours" badge, booking sessions show "Organic"/"Daily.co"

5.7 Video Call Join Buttons

Item	Detail
Feature	Added video call "Join" buttons across all views
Migration	`0012_cours_video_columns.sql` - Added video_provider, video_room_url, video_host_url, video_room_name to `cours`
Auto-Generation	`createCours()` now auto-creates Daily.co video rooms with student + host tokens
Backfill	Sessions page auto-generates video rooms for existing sessions missing them

Join Button Availability by View

View	URL	Button Label	Video URL Used
Admin Sessions	`/sessions`	"Rejoindre" (red)	`video_host_url` (host privileges)

Student Portal	`/portal/sessions`	"Join →" (blue)	`video_room_url` (student link)
Tutor Portal	`/tutor/classes`	"Join →" (blue)	`video_host_url` (host privileges)

5.8 Page Rename: Private Session 1v1

Item	Detail
Change	Renamed "Sessions Video" → "Private Session 1v1" across page title, sidebar, and browser tab
Filter	Page now only shows individual sessions (`type_cours = 'individuel'`)
Reason	Separate group sessions from 1v1 sessions for clarity

5.9 Group Classes Integration

Item	Detail
Feature	Group sessions from `cours` (type_cours='collectif') now appear on `/group-classes`
Section	"Group Sessions (Classes & Calendar)" section added below the main group classes table
Columns	Title/Subject, Tutor, Date, Duration, Students (with names), Location, Status, Actions
Actions	Join button (Daily.co) + View button for each group session
Auto-Backfill	Video rooms auto-generated for group sessions missing them on page load

6. Video Conferencing System

Provider Priority

Daily.co (Primary) - Used when `DAILY_API_KEY` is configured

Jitsi Meet (Fallback) - Free, used when Daily.co is unavailable

Daily.co Integration

Feature	Detail
Room Creation	Auto-created via Daily.co REST API when session is created
Room Naming	`cmp-{sessionId}-{YYYYMMDD}`
Token Types	Student token (isOwner: false), Host token (isOwner: true)
URL Format	`https://callmyprof.daily.co/{room}?t={token}`
Max Participants	Configurable per session (default: 2 for 1v1, max_eleves+1 for group)

Video Room Storage

Column	Table	Purpose
`video_provider`	cours, bookings	"daily" or "jitsi"
`video_room_url`	cours, bookings	Student video link
`video_host_url`	cours, bookings	Tutor/admin video link (host privileges)
`video_room_name`	cours, bookings	Room identifier

Auto-Backfill Logic

When the admin sessions page (`/sessions`) or group classes page (`/group-classes`) loads, it checks for cours sessions with missing video rooms. If found and the session date is in the future, it automatically creates a Daily.co room and updates the database.

7. Email System

Provider: Resend API

Email Type	Trigger	Recipients

Booking Confirmation	Student books a session	Student
Session Created (Student)	Admin creates a session at /cours/new	All enrolled students
Session Created (Tutor)	Admin creates a session at /cours/new	Assigned tutor
Session Reminder	Cron job (15 min intervals)	Student + Tutor
Password Reset	Forgot password request	Requesting user
Welcome Email	Account signup	New user

8. Student & Tutor Portals

Student Portal

- Dashboard with upcoming sessions count, next session, total paid
- Sessions page merging bookings + admin-created cours
- Video Join buttons for upcoming sessions
- Payment history & methods
- Profile editing with avatar upload
- Security (password change)
- Support ticket system

Tutor Portal

- Dashboard with class stats and earnings
- Classes page with calendar view + Action column
- Video Join buttons (host URL with host privileges)
- Schedule/availability management
- Student list from assigned sessions
- Earnings & payout settings
- Support ticket system

Data Architecture Note

Two Student Systems: Students exist in the `users` table (role='eleve') for portal access AND historically in the `eleves` table (legacy CRM, now empty). All current code references `users` table. The `cours_eleves.eleve_id` column references `users.id` (FK constraint was removed in migration 0011).

9. Security & Authentication

Feature	Implementation
Password Hashing	PBKDF2 with salt (Web Crypto API)
Session Management	D1-backed sessions with expiry
HTTPS	Enforced via Cloudflare

XSS Protection	`escapeHtml()` on all user-provided data
SQL Injection	Parameterized queries via D1 `.bind()`
CSRF	Session-based validation
Auth Separation	Separate login flows for admin, student portal, tutor portal
Password Reset	Time-limited tokens via `password_reset_tokens` table

10. Cloudflare Configuration

Setting	Value
Account	samirdawaliby@gmail.com
Account ID	`bc9bdfa814d313ad361e1120f2d57af9`
Worker Name	`callmyprof`
D1 Database	`callmyprof-db` (ID: `2294dbe8-f898-4c8c-a8fd-0f62563e19a9`)
R2 Bucket	`callmyprof-docs`
AI Binding	`AI` (Workers AI)
Cron Schedule	`*/15 * * * *` (every 15 minutes)
Compatibility Date	2024-09-23
Compatibility Flags	`nodejs_compat`

Custom Domains

- `callmyprof.com` (primary)
- `www.callmyprof.com` (redirect)

Environment Secrets

Secret	Status	Purpose
DAILY_API_KEY	Configured	Daily.co video rooms
RESEND_API_KEY	Pending	Transactional emails
STRIPE_SECRET_KEY	Pending	Stripe payments
PAYPAL_CLIENT_ID	Pending	PayPal payments
WHATSAPP_TOKEN	Pending	WhatsApp Business API

11. Useful Commands

Development

```
# Start local development server
npm run dev
```

```
# Deploy to production
npm run deploy

# TypeScript type checking
npm run typecheck

# Deploy via wrangler directly
cd callmyprof/callmyprof && npx wrangler deploy
```

Database Operations

```
# Run SQL on production D1
npx wrangler d1 execute callmyprof-db --remote --command "SELECT ..."

# Apply a migration
npx wrangler d1 execute callmyprof-db --remote --file ../migrations/0012_cours_video_columns.sql

# Check table schema
npx wrangler d1 execute callmyprof-db --remote --command "SELECT sql FROM sqlite_master WHERE name='cours'"
```

Secrets Management

```
# Set a secret
npx wrangler secret put DAILY_API_KEY

# List secrets
npx wrangler secret list
```

12. Roadmap & Status

Phase	Feature	Priority	Status
MVP	Landing, CRM, Booking, Video, Onboarding, Chatbot, Catalogue	Critical	Complete
Sessions	Private 1v1 sessions, Group classes, Video join buttons, Email notifications	High	Complete
Portals	Student portal, Tutor portal (dashboard, sessions, profile, support)	High	Complete
Phase 1	Stripe + PayPal payments	High	Not Started
Phase 2	PDF invoices	High	Not Started
Phase 3	Video links auto-generation	Medium	Complete
Phase 4	Student portal enhancements	Medium	Partial
Phase 5	Group classes enhancements	Medium	Partial

Phase 6	Discord notifications	Low	Not Started
Phase 7	MFA admin	Low	Not Started
Phase 8	WhatsApp Business	Low	Not Started
